LEGAL DISCLAIMER

It is required you read disclaimer section carefully. If in doubt, Please seek legal, financial, tax, or other relevant legal counsel. All information provided in this document is not complete and should never be interpreted as part of separate contractual agreements.

We strongly believe all products, services, technical architecture, token distribution, corporate timelines, and information provided in this white paper are accurate and up to date.

In addition, all documents are subject to change without notice and should not be considered a signed notification agreement.

NO ADVICE

This white paper does not require the signing of any contract nor the legal obligation to contribute. This white paper is not a legal opinion, nor can it be used in any form as a contact or investment decision. In addition, it cannot be used to sell or solicit any offer by Trillions to purchase our token.

COMPLIANCE WITH TAX OBLIGATIONS

Website owners or authors are not responsible for your understanding of transaction taxes. Website users are solely responsible for understanding which taxes, if any, apply to their transactions.

LIMITATION OF LIABILITY

RULE shall not be liable for any loss or damage resulting from our actions, including, but not limited to, written documentation, link to third-party sites, data, quotations, charts, and the purchase of sale signals. Please be fully informed of any associated risks and expenses related to trading assets in financial market (digital or others).

INVESTMENT RISKS

Cryptocurrency trading has an elevated level of risks and is not suitable for all investors. You should carefully evaluate your investment goals, level of expertise, and risk appetite before trading in cryptocurrencies, token, or any other digital assets.

ABSTRACT

This white paper provides an easy-to-read description of a decentralized cryptocurrency based on Binance. As we all know, the popularity of digital currency has enabled a new economy to thrive alongside the existing traditional money tied to centralized banking. Many investors hold their digital cash with no profit (especially during the downmarket period). MYShiba Inu is a cryptocurrency and rewards marketplace with the safeguarding of decentralized smart contracts. With blockchain technology, MYShiba Inu will facilitate a financial revolution, empowering investors to feel more financially and socially connected.

MYShiba Inu is the native currency that powers a community-driven platform fostering financial well-being for people of all ages and cultures to be in control of their money and create opportunities to accumulate wealth. MYShiba Inu will be different from other crypto tokens in that it will contain real-world assets and will yield passive income to its holders. MYShiba Inu has a vibrant ecosystem that is designed to reward people for their contribution to communities they reside, businesses they patronize, and opportunities they create to help elevate others.

MYSHIBA INU

MYShiba Inu (MYSIB) is redesigning how decentralized meme finance (DeFi) is structured. As we progress in the advancement of user-centric apps and work together with partners, MYSIB should become intrinsic to a higher quality of life. MYSIB is focused on reshaping and evolving the way DeFi works while providing the most degenerate ecosystem ever designed for the necessary advances in DeFi.

MYSIB will help usher in this phenomenon by building a digital ecosystem that is a construct of smart communities populated by people and their connection to each other – that facilitates the sharing of information in a way that builds social capital and unlocks economic potential.

MYSIB long -term plan has been formulated to ensure that the economy is at a stable level and beneficial to investors. Among the plans that have been made include developing MYSIBSWAP, NFT MYSIBHUB and MYSIBMALL.

OUR MISSION

Our mission is "Adoptability and Sustainability"

Make adoption for the Dollo Coin more accessible while creating community that helps people accumulate and sustain wealth. This will be accomplished by building a digital ecosystem that is a construct of smart communities populated by people and their connection to each other – that facilitate the sharing of information in a way that builds social capital and unlocks economic potential.

Our mission has always been to make it as simple as possible to interact with cryptocurrency, while also being a leader in security, reliability, and custody.

OUR COMMITMENT

- * Provide ease to buy, sell or hold MYShiba Inu and provide holders with an opportunity to accumulate wealth.
- * Provide every holder with simple and effective ways to gain exposure to digital assets.
- * Lower the barrier for entry to a more advanced financial ecosystem. We strive to innovate & develop new tech to help businesses and communities collaborate using MYSHIB as incentives, fostering economic growth.
- * Inspire innovations in education, builds confidence, and breaks down barriers to opportunities.
- * Operate as a community-focused and community-driven digital asset.
- * MYShiba Inu is designed to innovate the labor market allowing people to do what they love to do while accumulating longterm wealth.

OUR VISION

MYShiba Inu aims to address current pain points that impede the crypto custodial experience for the general public by developing an application that embodies the best in security, transparency, and simplicity.

We aspire to put “cryptocurrency in every portfolio.” We envision a world where wealth-building strategies that were once only accessible to affluent individuals become available to everyone, transferring the power back to the people. MYShiba Inu is going to create a revolutionary ecosystem to bring more people into digital assets, helping to earn a passive income through holding the different currencies along with maintaining their privacy, security, power, and autonomy.

We believe that through the power of collective decentralization, we can build an affordable crypto-powered ecosystem where people benefit from their contributions to the community they reside, businesses they patronized, and people they elevate.

MYShiba Inu aims to be the most known and used cryptocurrency in the digital industry.

MYSHIBA INU ECOSYSTEM

Community

Community is the number one value of the MYShiba Inu Ecosystem. In the beginning, we asked if a project could succeed on the back of a decentralized, community effort. MYShiba Inu prevailed due to the strength of its community members and coin holders. Our collaborative, Likeminded community is the bedrock of the project.

Utility

We believe utility is the foundation of value in the crypto space. MYShiba Inu was founded on the principle that the crypto space is greatly lacking in real world use case. We believe a utility that bridges the gap between real world and the crypto space can and will foster rapid adoption and growth in the crypto space. MYShiba Inu believes it to be the brand loyalty reward system that people adopt due to its community-focused nature.

Interconnectivity

Simply put, all parts of a system interact with and rely on one another. MYShiba Inu believes in creating an interconnected system based on trust and reliability, that together is greater than its individual parts.

PASSIVE REWARDS

Once you have acquired MYShiba Inu, you will automatically receive MYSHIB rewards into your crypto wallet. This reward plays an important part in addressing a variety of issues to provide holders with earnings depending on the number of tokens exchanged in the market. This method is designed to satisfy early adopters who want to take profits after earning high APYs. It attempts to relieve some of the negative sell pressure on the token.

The reflecting mechanism encourages the holders to keep their tokens to earn greater reflections, which are calculated as a proportion of the total tokens owned by the holder. 1.0% of every buy and sell transaction is redistributed to all token holders – your portion is directly deposited into your wallet. HODL and watch it grow indefinitely.

THE BURN

In our ecosystem the burns are important until it is not. In the early days burning coins is significant. The burn become less pertinent as the community proliferate - as will wealth accumulation.

Some burns are managed by the contract and other burns are managed by the team. This allows for progress to be monitored and a foundation for growth to be formed.

WHY MYSHIBA INU

Open for global participants.

MYShiba Inu facilitates the transaction and brings them closer to a wider audience. An added benefit of MYShiba Inu use is that it's completely decentralized, so trading can be done freely across borders. The use of technology will help facilitate a financial revolution that should leave everyone more financially connected, empowered, and enabled. MYShiba Inu has no border so they can be used no matter where you are located globally. This also has a huge effect on international payment fees. Traditionally international transfers have much higher fees than domestic transfers and payments. International payments and transfers with crypto are the same as domestic.

Binance Blockchain

MYShiba Inu is a Binance-blockchain token means that it supports a few functions that all BEP-20 tokens support.

Transparency and Immutability

Each time MYShiba Inu is traded, it is recorded on the blockchain. An audit trail is present to trace where the token came from. This helps improve security and prevent fraud in exchange-related businesses, and also helps verify the authenticity of the traded assets.

Ease of use

Ease of use is the reason why MYShiba Inu has more value. All you need is a smart device and an internet connection. Investors can easily earn rewards by holding the token.

Transaction Traceability

MYShiba Inu is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction. MYShiba Inu is formed by a complicated string of mathematical numbers and is impossible to be altered. This immutable and incorruptible nature of the MYShiba Inu makes it safe from falsified information and hacks once formed.

Safe and Secure

MYShiba Inu is a safe and secure platform which is verified on BSCscan and our technical team is continuously improving the security of system to ensure the safety of platform.

MYSHIBA INU PROTOCOL

BINANCE SMART CHAIN:

MYShiba Inu run on a private web blockchain. **BINANCE SMART CHAIN** is a decentralized platform for their users to invest their liquid assets as a security token and earn rewards, as well as various products and services, with open-source, peer-to-peer cryptocurrency, allowing all buyers and sellers to trade their tokens without interference or to execute trades online securely and privately with comparatively lower fees. Binance can significantly reduce your costs, with an average transaction fee of 0.1 percent (or less).

COMMUNITY-DRIVEN PLATFORM

MYShiba Inu is a community-driven platform, thanks to community- driven development users do not need to transmit their assets to the centralized exchange. Establishing a community-driven platform reduces the possibility of theft through the exchange of hackers. We plan to design and launch a rug-free crypto project. Our ever-growing community is composed of passionate individuals across the world, each playing an important part in the growth and development of MYShiba Inu.

RUG FREE AND COMMUNITY- DRIVEN PLATFORM

A rug pull is a hostile maneuver in the cryptocurrency business in which crypto engineers abandon a project and flee with investors' monies. Rug pulls are frequent in the decentralized finance sector, especially on decentralized exchanges; our platform would be impervious to such malice. Being a team that have experienced rug-pulls , we are committed to put in place protocols to ensure our holders have a thriving ecosystem.

MYSHIB DETAILS

TOTAL SUPPLY : 21,000,000,000 MYSHIB

TOKEN NAME : MYShiba Inu

SYMBOL : MYSHIB

| LOCKED | 10,000,000,000 MYSHIB |

ROADMAP

ENTREPRENUERS

- Unique team building
- Social media setup
- Litepaper V1 Released
- Community Builder
- Basic Marketing campaign
- Website Development
- Presale Advertising
- Presale On webpage
- Pre-sale preparation (Coinstarter)
- Pre-sale started On Coinstarter Launchpad

PIONEER

PRE-MASTER

Pre-Phase I

- ❖ Website Upgraded.
- ❖ Audit.
- ❖ Volume Stabilizer.
- ❖ Medium Marketing.
- ❖ Start Deligation with Bscscan.

DELEGATING WITH

Delegating is the process of contributing one's digital asset to public validator,to help conduct PoS validation and earn rewards.Delegating is a critical part of participating in many proof of stake protocols.Out of necessity or desire,delegators can participate in the network and earn reward all without having to operate a validators.We delegate 30% from our marketing wallet to a validator node and in exchange for locking the value of our asset to the node,earn percentage of total block reward earned by that validator.This system is to ensure the continuity of the economic level of \$MYSHIB can last a long time and create various investment opportunities for our investors in the future.
